

“Hello, my name is Pragati Swami. I have about 3 years of experience working as a **Data Scientist**, mainly in **Machine Learning**, **Deep Learning**, and **Generative AI**.

In my current role at AIML Labs, I have worked on **end-to-end projects**—from data processing and model training to deployment—to build AI solutions that help businesses. One of my most important projects was creating an **AI-powered HR Support Chatbot** using **LLMs**, **LangChain**, and **RAG pipelines**. This chatbot helped answer employee queries automatically and reduced HR’s manual work by 40%.

I also have hands-on experience in **Natural Language Processing** tasks like text classification, Named Entity Recognition, and voice technologies, with strong skills in **Python**, **PyTorch**, **TensorFlow**, and **HuggingFace**.

I am passionate about applying AI to real-world problems, especially in the areas of **NLP** and **Generative AI**, and I’m excited about the chance to bring this knowledge and energy to your team.”
